PROJECT TITLE: Promoting Academic and Social Success in the Least Restrictive Environment

PROJECT DESCRIPTION

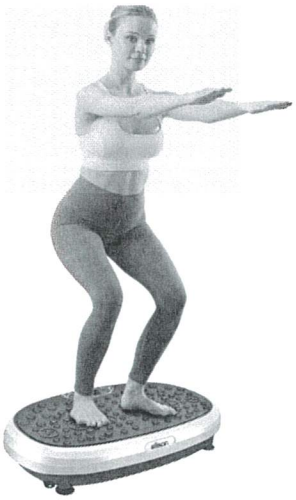
The goal for this project is to have students participate confidently and be successful academically within their educational setting.

The data is collected quarterly in the form of progress reports for students with IEPs and through the PowerSchool grading system. Progress monitoring is collected daily to ensure goals and curriculum-based objectives are being met. The items listed below will be essential tools to help reach those goals.

Innovation and Enhancement of Learning

Whole Body Workout Vibration Platform

The whole-body vibration plate exercise machine has a unique acupressure plate surface which with the help of strong vibration from our vibration platform machine presses the pressure points on the feet which helps in relieving back pain, headache, blood circulation, muscle & joint pain, stress, anxiety. This workout machine helps students relieve anxiety and meets sensory needs for them to have more focus on academic tasks.

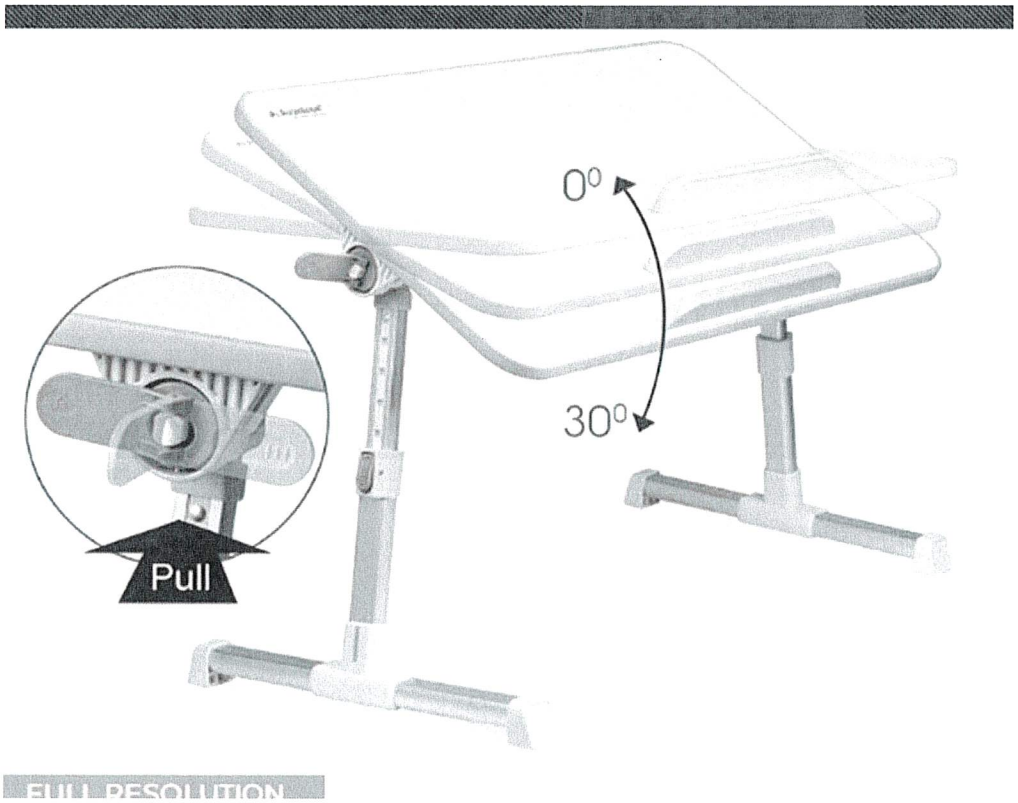


ARK's Z-Vibe Sensory Oral Motor Kit - ultimate kit with most popular tips & exercise book

The Z-Vibe is an innovative, vibratory oral motor device that provides a vast range of sensory stimulation. This tool provides targeted tactile input and proprioceptive input to the lips, gums, cheeks, and tongue by stroking and applying gentle pressure. The various textures together with the smooth, gentle vibration helps "wake up" the mouth, increase oral awareness, normalize oral sensitivities, and decrease food aversions.

FOLDABLE LAPTOP TABLE

This tabletop standing desk is ideal for all learners. It allows students to move freely while learning in their least restrictive environment. It adjusts to allow optimal handwriting assistance to meet all student needs.



FULL RESOLUTION

AUDIENCE & SUSTAINABILITY

This project will support students in Learning Support Inclusion classrooms. The ultimate goal for students with special needs is to promote independence. These items can be used in the Learning Support and within the general education classroom to help students achieve academic goals.

For the 2025-2026 school year, there are approximately 30 students with IEPs. As previously stated, these items will also be utilized by students within the Learning Support Inclusion classroom. Depending on class size in each inclusion classroom, there are 20-25 students who will have the opportunity to use these items to assist with their academic and social achievement.

PROJECT EVALUATION

Progress monitoring happens daily within the Learning Support Inclusion classrooms. Data is collected quarterly to assess that goals are being met. Progress reports and report cards are sent home to families during the 4 nine-week periods that school is in session. IEP meetings happen annually to discuss the academic and social success of students with special needs.

BUDGET

	ITEM	UNIT PRICE	TOTAL	TOTAL* (if you will accept less based on funds available)
1	Exercise Machine - Whole Body Workout Vibration Platform w/Loop Bands - Lymphatic Drainage Machine for Weight Loss, Shaping, Wellness, Recovery {Amazon}	$175.99 [Quantity 1] **Color: Silver**	$175.99
